

Virtual Receptionist

Cloud - PBX

Will you like a PBX with zero capex / investment?

Will you like a PBX which can expand quickly ?

Will you like a PBX with zero capex / investment?

Will you like your PBX updated with latest technology at zero cost?

Will you like your PBX to work without power backup?

World Phone remains to be one of the first to acquire ISP/ITSP license in year 2002. It has always been a game changer in the cloud based telephony market. World Phone is one of the first to lower international calling rates by launching international calling rates as low as Rupee 1 per minute way back in 2005.

Virtual Receptionist

The diagram illustrates a cloud-based communication system. At the top, two light blue clouds are shown. The left cloud contains an orange oval with the text 'Virtual Receptionist'. The right cloud contains an orange oval with the text 'Cloud - PBX'. Dotted lines connect these clouds to a laptop and a desk phone below. The laptop is connected to the 'Virtual Receptionist' cloud, and the desk phone is connected to the 'Cloud - PBX' cloud. Both the laptop and the phone are connected to a central logo for 'WORLD PHONE' at the bottom. The logo consists of the word 'WORLD' in grey and 'PHONE' in orange, with a red telephone handset icon integrated into the letter 'O' of 'WORLD'. The entire diagram is set against a white background with orange decorative elements in the corners.

Cloud - PBX

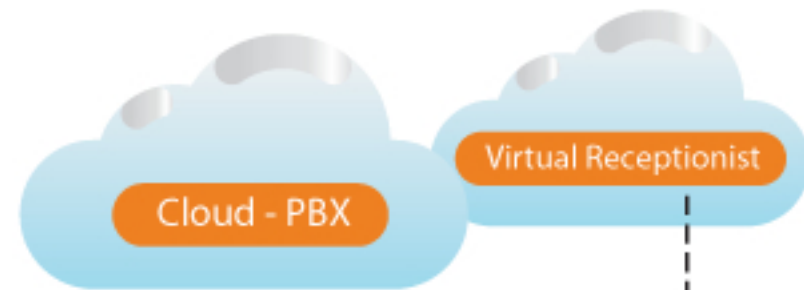

Cloud PBX is the process of transferring the load of managing voice calls and other telephony to the cloud. Using an Internet-based phone system has threefold benefits for end users, first of these is the low upfront cost of installing cloud PBX systems in existing enterprise infrastructure as well as the cost benefits of not needing to maintain and upgrade telephone lines. The second one is that it simplifies the available telephone networks and reduces the complexity. Lastly, the ability of cloud PBX to host multiple virtual networks without the need for separation further increases efficiency and cost savings.

The cloud PBX market is expected to reach a valuation of USD 20.83 billion by the end of the forecast period from 2017 to 2023, according to the latest research report from Market Research Future (MRFR).
